DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 40 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language "carrying out said method with presence of a diene-bis-aquo-rhodium(I) complex" is confusing. This appears to imply that the diene-bis-aquo-rhodium(I) complex acts as a catalyst in the preparation of the heterogeneous catalyst. It is clear from the specification (page 9) that the complex is used as a precursor for the heterogeneous catalyst. Please clarify.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 44 and 45 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Harry et al., *Inorganica Chimica Acta*, Vol. 97, pp. 143-150 (1985), cited

Art Unit: 1621

by Applicants. The Harry et al. article discloses rhodium phosphine complexes. See Table I at page 144. See particularly the compound $[\text{Rh}(\text{COD})(\text{PPh}_3)_2][\text{ClO}_4]$. Note that although the compound was prepared by a different method the compound is the same. “[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

6. Claims 20-29, 39, and 41-45 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Hashmi et al., Adv. Synth. Catal., Vol. 345, 1237-1241 (2003), cited by Applicants. The Hashmi et al. article disclose the metal complex salt $[(\text{COD})\text{Rh}(\text{H}_2\text{O})_2]\text{CF}_3\text{SO}_3$ and (R)-BINAP useful in the conversion (2Z)-(3-Pent-2-enyloxy-prop-1-ynyl)benzene to 3-Benzylidene-4-propenyltetrahydrofuran.

7. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Allowable Subject Matter

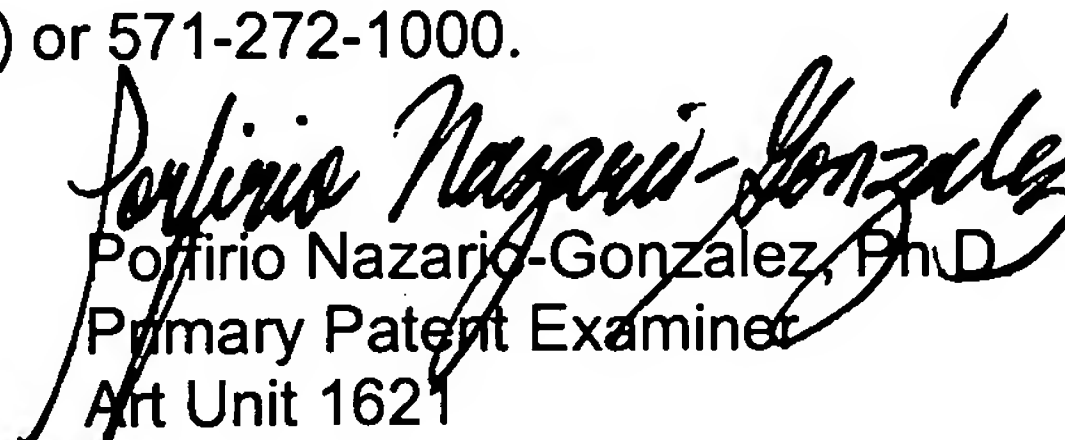

8. Claims 30-38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
